Best in Leather Interior

BOXMARK®

BOXMARK – BEST IN LEATHER FOR AIR

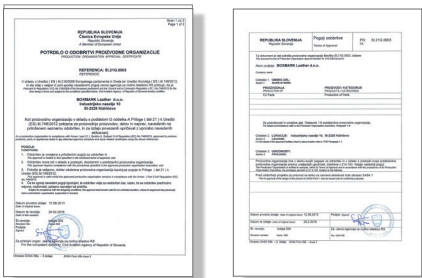

BOXMARK is one of the world's leading manufacturers of high-class upholstery leathers. We supply the premium segment of the aircraft, automotive, furniture, railway and shipping industry. Our extremely well trained staff guarantees superior quality and custom-made services regarding the leather products.

PRODUCTS

BOXMARK offers a wide range of aircraft upholstery and component leathers tailor-made to meet the high requirements in commercial aviation. The product portfolio includes upholstery solutions with leather for aircraft seats, wall panels, leather flooring (in cooperation with F/LIST), built-in parts and airport interior:

CERTIFICATIONS

BOXMARK is certified according to the ISO management system standards ISO 9001, ISO 14001, to IATF 16949 and to the Production Organisation Approval (POA), Part 21, Subpart G from EASA.

SUSTAINABILITY

Environmentally-friendly and state-of-the-art production is not only a constant challenge for us but also a commitment to the present and our shared future. We have standards that lie significantly above the stringent legal requirements. Our certifications are the basis for the management's all-out ecological and energy-efficient approach. This concept applies to all our departments and activities.

INNOVATION

We invest in the conscious development of market-oriented products and the consistent research of innovative processing technologies in cooperation with scientific research institutions. It is one of our company's ultimate objectives to meet the ever increasing technical requirements, and, despite these challenges, to maintain the uniqueness and emotional attraction of leather as a natural product.

LEATHER - MANUFACTURING

LEATHER - PROCESSING

BOXMARK – ENTIRE VALUE CHAIN IN LEATHER

BOXMARK offers the entire value chain starting from Research & Development to design and leather manufacturing down to leather interior ready for use.

RESEARCH & DEVELOPMENT

With its research and development centre BOXMARK has for decades been playing a crucial role in the leather industry. Now BOXMARK is recognized as a development partner also in the aircraft industry. In cooperation with the industrial sector, customer and market-oriented innovative products as well as state-of-the-art manufacturing technologies are developed.

DESIGN

The process of the conscious design and coloring of a product which lives up both to the aesthetics, usefulness and functionality of the manufactured item is a great challenge that BOXMARK faces every day. In addition, BOXMARK cooperates with recognized external designers (e.g. Jacques Pierrejean). On the basis of its existing know-how and technical facilities, BOXMARK is able to create not only leather interior on the highest level but also foam models and perform foam reconstructions.

LEATHER - MANUFACTURING

European bull hides are processed to become finest full-grain leather. The environmentally-friendly vegetable tanning does away with the use of chromium. The highest customer expectations are met with our customer-specific surface finish. During the entire production process staff with year-long experience checks the individual natural leather structure. The finished leather is processed further at BOXMARK or dispatched to our customers as whole leather hides.

LEATHER - PROCESSING

BOXMARK is able to offer the entire bandwidth of processing steps:

- Cutting
- Perforating
- Sewing
- Embossing
- Laminating
- Wrapping

BOXMARK – AIRCRAFT LEATHERS

Cabin interior for the aviation industry has to be particularly hard-wearing and comfortable. Our high-quality products offer both; they conform to standards and add a particular charm, coupled with great durability and excellent hygienic properties. BOXMARK is also an experienced supplier of flame-retarding equipped leather providing any common fire resistance specification worldwide.

KING: KING is an embossed and pigmented bull hide leather of European origin with a thickness of 1.0 to 1.5 mm. It is available in 20 standard colors and different embossing. On request, special colors can be developed with the outstanding technical standards of this collection.

ROYAL: ROYAL is an embossed and pigmented bull hide leather with a thickness of 1.2 to 1.4 mm. The natural beauty and excellent durability of this leather is captivating. For many decades its positive characteristics have made it the perfect choice around the globe. It's available in 20 standard colors.

XTREME: XTREME is a resistant, pigmented and embossed bull hide leather with a thickness of 1.2 to 1.4 mm. This resilient leather combines very good technical properties with the fantastic feel, elegance and ambience of a natural product. It's available in 20 standard colors.

X-ECO: The sustainable product line X-ECO consists of three leather innovations. XGREEN uses only purely vegetable tanning agents such as leaves or herbs from trees and plants. In the case of ORGANIX, organic waste materials from other industries are recycled for leather production by tanning with a mixture of liginosulfonate and cocoa shells and XLOOP is a compostable leather without chromium or glutaraldehyde.
